(a) chord → n
B2 n = 1 window (q05–q95)
B2 suppressed → n = 0 (bare candidate)
B2 binned mean n
h405 binned mean n
scored n
emission-axis chord [Å]
(b) chord → KE
B2 n = 1 window (q05–q95)
B2 suppressed (intact-complex KE)
B2 ions, n ≥ 2
B2 ions, n = 1
B2 binned mean KE
h405 binned mean KE
exp KE₁ mean 1.30 eV
exp KE₁ median 1.13 eV
detected KE [eV]
emission-axis chord [Å]
(c) chord distribution per sampler
raw (A5), N = 12000
post_pickup (B2 = A5, identical births), N = 12000
probability density [1/Å]
emission-axis chord [Å]
