2-D detector projection vs velocity
signal, envelope-normalized
projected speed v·sinθ / m s$^{-1}$
I$^+$
I$^+$He
I$^+$He$_2$
I$^+$He$_3$
I$^+$He$_4$
3-D reconstruction P(v) vs velocity
signal, envelope-normalized
speed / m s$^{-1}$
dashed: $v(\langle E \rangle)$, not $\langle v \rangle$
